TOTAL: \$1,954,103  
↑ 12.6%

### CITY OF SAN JACINTO HIGHLIGHTS

San Jacinto's receipts from April through June were 3.7% above the second sales period in 2021. Excluding reporting aberrations, actual sales were up 11.7%.

In 2Q22 gas prices were up an average of \$1.89 a gallon when compared to the year-ago period, driving up revenue from fuel-service stations. Revenue from food-drugs continues to rise due to market inflation, supply chain issues, embargoes on Russian gas, and a shortage of livestock feed.

The manufacturing industry is building back fast, undeterred by significant labor and supply chain challenges. Revenue from the building-construction sector remained flat.

Consumers are pessimistic about economic conditions which is negatively impacting retail shopping trends. Parts shortages, tight inventory and supply chain issues continue to plague the autos-transportation industry.

The City's share of the countywide use tax pool increased 4.2% when compared to the same period in the prior year. Measure V, the City's voter-approved transactions and use tax, brought in an additional \$1,949,433 in revenue led by sales from the autos-transportation and general consumer goods sectors.

Net of aberrations, taxable sales for the Southern California region was up 11.1% over the comparable time period.

### TOP 25 PRODUCERS

7 Eleven	O'Reilly Auto Parts
Arco AM PM	Quality Turf
Blazed Utopia	Rite Aid
Budology	San Jacinto Fastrip
Cardenas	San Jacinto Shell
Chevron	San Jacinto Unified School Dist
Circle K	Stater Bros
Del Taco	Summit Livestock Facilities
Hirsch Pipe & Supply Co	Walgreens
Interstate Steel Structures	Walmart Supercenter
Jack in the Box	
Lca Metal Components	
McDonalds	
Mobil Shop N Go Food Store	
Nutrien Ag Solutions	

## STATEWIDE RESULTS

Local one cent sales and use tax for sales occurring April through June was 10% higher than the same quarter one year ago after adjusting for accounting anomalies and back payments from previous quarters. These returns mark the sixth consecutive quarter of double-digit growth since the pandemic periods in 2020, with the July-June 2022 fiscal year up 15%.

Commuters returning to offices combined with the Russia-Ukraine conflict continuing to put upward pressure on oil prices and left Californians facing the highest average price per gallon on record resulting in fuel and service station receipts 42% higher than last year. While statewide fuel consumption still trails 2019 levels, local gas prices are expected to remain high until after the summer blend period.

Led by consumer's desire to dine out, a steady rise in tourism and business travel, higher menu prices and great weather, the restaurant sector continues to flourish. Theme parks, entertainment venues and hotels showed the strongest growth with casual dining establishments remaining solid, a trend likely to remain through 2022.

The automobile sector experienced modest gains for new car dealers and rental car vendors, however sales of used autos and leasing activity has begun to cool. Brands prioritizing full electric and hybrid models still appear to be the most attractive with consumers, however increased financing rates may cause even their activity to dampen. Tight inventories that contributed to dramatic price increases over the last 18 months are also showing signs of loosening as newer models are released

in greater numbers.

General consumer goods categories saw steady returns largely propped up by retailers also selling fuel. In comparison with the prior year when consumers were buying merchandise at a record pace, the current returns from apparel and jewelry stores grew moderately with home furnishings showing a slight decrease.

With new housing starts accelerating and residential and commercial property values rising, construction contractors remain busy. Lumber prices have softened from prior year highs leaving material suppliers with modest gains, however electrical, plumbing and energy suppliers

boosted building sector results. Increased investment in capital equipment remains an important area of growth for county pool allocations, especially as online spending for general consumer goods begins to flatten as consumers return to in-store shopping.

Overall, higher priced goods through periods of consistent demand have led to economic inflation. The Federal Reserve Board's recent actions to curb inflation are anticipated to put downward pressure on sales of autos, building materials and financed general consumer goods, resulting in slower growth by year end and into 2023.
